

Cloud30 - Our Suite of Cloud Services

The Problem ...

For most SME's the process of migrating from traditional computer systems to cloud services can be a minefield. Where do you start? Who can you turn to? What if your first attempt at using the cloud goes badly wrong?

The Solution ...

We've brought together and developed "best of breed" cloud services for SME's and devised Cloud30 - it takes all the leading cloud technologies and turns them into a complete SME cloud IT solution. Unlike most cloud offerings, Cloud30 is not a one size fits all - it's a practical, real world set of business solutions specifically devised for the SME that can be configured to specifically meet your business needs.

Cloud30 Modules ...

- ✓ Desktop as a Service.
- ✓ Microsoft Office 365.
- ✓ File Server as a Service.
- ✓ Disaster Recovery as a Service for Servers.
- ✓ Emergency Broadband as a Service.
- ✓ Reassure 60 Backup and Recovery for Business Data.
- ✓ + many more great apps and services.

The Costs ...

In order to quote accurately for your business, we need to know quite a lot about your IT; number of users, what applications you run, how much disk space you need & quite a number of other facts and figures. But typically Cloud30 total costs of ownership over 3 or 4 years for an SME employing 25+ are significantly less than traditional IT.

Call To Action ...

Professional business class cloud services, implemented properly will reduce your overheads. When comparing with conventional IT, look beyond the initial capital outlay of the PC's, apps or servers. Factor in your total cost of ownership of a conventional computer system. Quite simply Cloud is less expensive.

Don't wait for your competitors to implement Cloud services first and get their overheads down before you do it. Take a good look at the benefits with us - we'd be delighted to do a demo. Once you've compared your conventional way of working with our Cloud30 solution, we'd like to think you'll be impressed, maybe even amazed.

For more information about Cloud30 or any of our products & services, give us a call on
